

Experiences of Mothers Using the Prevention Mother-to-Child Transmission Program to Prevent Human Immunodeficiency Virus (HIV) Transmission in Rwanda

Virtual (Zoom) Presentation on: Monday 17 October 2022, 12noon-1:00pm

*An event organized by the Office of the Women's Health Research in Mental Health and funded by the Lillian Meighen and Don Wright Foundation

The health of women and children is interlinked. HIV/AIDS is among the causes of death of millions of children under five. Without preventive interventions, 20% to 45% of HIV + mothers will transmit HIV to their children. This presentation will focus on experiences of mothers using the Prevention Mother-to-Child Transmission (PMTCT) program to prevent HIV transmission. Each of the HIV+ women's stories and experiences represent different pathways and intersections that determine their vulnerability.

Speaker

Dr. Joyce Kamanzi is the current Lillian Meighen Wright Postdoctoral Fellow in Maternal-Child Health (Supervisor: Professor Nazilla Khanlou). Dr. Kamanzi completed her doctoral studies at the Faculty of Nursing, University of Alberta, Canada. She is a nurse and previously worked as Quality Manager in Rwanda. Her doctoral research focused on exploring the experiences of mothers using the PMTCT Program to prevent HIV transmission.

Moderator: Dr. Nazilla Khanlou, Academic Lead of the Lillian Meighen Wright Foundation Maternal Child Health Scholars Program, and Women's Health Research Chair in Mental Health, Faculty of Health, York University
